Informational Interview Tracker

This agenda worksheet will serve as your tracker for the individual conversations you have for your projects in-course, and what you will use to keep record of your informational interviews as a part of the Job Guarantee program. We recommend using the [networking tracker](#) to keep track of your outreach attempts, and this worksheet encompasses your preparation, completion, and submission.

Interviewee Name	Juan A. Figueroa
Interviewee LinkedIn Profile	linkedin.com/in/juanafigueroa
Date Completed	Oct 7, 2024 (click date to change)
Outreach Message <small>You can use examples from the LinkedIn Connection Requests & Outreach Guide.</small>	Hi Juan, I'm exploring a career in data science and would love to learn about your experience. Would you be open to answering a few questions? I appreciate any advice! Thanks!
Prepared Questions <small>Remember to prepare 5-10 questions based on the length of time you have</small>	Breaking into Data Science: What steps would you recommend for someone with no prior experience trying to break into the field? Learning Resources: Are there any resources (books, courses, websites) you would recommend for someone new to data science? Company Culture: What is the company culture like where you work? Team Collaboration: How does your team collaborate on projects, and what tools or methods do you use?
Notes from Conversation <small>What did you learn? What were your take aways? Resources shared? Action item?</small>	What did you learn? I am on the right track by taking a course in data science and working with data Resources shared? A cloud certification in Data Science or Machine learning would help my chances at landing a job What were your take aways? Specialized courses, hands-on data experience, and cloud certifications (Azure, AWS) are key to breaking into data science. Action item? Explore data science certifications, practice with real datasets, and consider cloud certifications through platforms like Udemy or Coursera.
